June 12, 2008

GOLDEN, COLORADO – Ultrasound, x-ray and physiological monitoring equipment company Echoserve, Inc., announces the opening of sales and service offices in metro New York, NY, Orlando, FL, Chicago, IL, and Detroit, MI. The company has also continued to add engineering, repair and customer service personnel at its headquarters office in Golden, CO.

“Our customers have asked us to bring Echoserve’s technical capabilities and expertise closer to them,” said Christopher M. Cone, Chief Executive Officer of Echoserve. “A direct presence in the largest U.S. metro areas allows us to serve the majority of the country with no more than two-hour travel times. We plan to open more regional offices in the near future.”

“The resources we continue to add allow Echoserve to better serve the needs of 3rd-party service organizations and clinical users of imaging and patient monitoring equipment. We are investing heavily in the engineering expertise required to support many of the emerging technologies in our industry. Leveraging our technical personnel, we are introducing leading-edge repair and field service solutions in such areas as hand-carried ultrasound, ultrasound transducers, PACS networking, digital mammography and telemetric physiological monitoring. These efforts provide the medical community with highly cost-effective alternatives for the maintenance of equipment,” added Mr. Cone.

ABOUT ECHOSERVE

Echoserve, Inc. is a private company based in Golden, Colorado. The company provides new and refurbished equipment, field service, technical support, and part depot repair / exchange services to hospitals, clinics, service organizations and equipment dealers in the diagnostic ultrasound, general x-ray, mammography, bone densitometry and physiological monitoring markets.
