August 7, 2007

GOLDEN, COLORADO – Ultrasound and x-ray equipment company Echoserve, Inc., announces the opening of sales and service offices in metro Los Angeles, CA, Phoenix, AZ, Dallas, TX, Nashville, TN, Boston, MA, Philadelphia, PA, and Washington, DC. The company has also added engineering, repair, sales and field service personnel at its headquarters office in Golden, CO.

"Our customers have asked us to bring Echoserve's technical capabilities and expertise closer to them," said Christopher M. Cone, Chief Executive Officer of Echoserve. "A direct presence in the largest U.S. metro areas will ultimately allow us serve the majority of the country with no more than two-hour travel times. We plan to open more regional offices in the near future."

"These resources allow Echoserve to better serve the needs of 3rd-party service organizations and clinical users of imaging equipment. We are investing heavily in the engineering expertise required to support many of the emerging technologies in our industry. Leveraging our technical personnel, we are introducing leading-edge repair and field service solutions in such areas as hand-carried ultrasound, ultrasound transducers, PACS networking and digital mammography. These efforts provide the imaging community with highly cost-effective alternatives for the maintenance of equipment." added Mr. Cone.

ABOUT ECHOSERVE

Echoserve, Inc. is a private company based in Golden, Colorado. The company provides new and refurbished equipment, field service, technical support, and part depot repair / exchange services to hospitals, clinics, independent service organizations and equipment dealers in the diagnostic ultrasound, general x-ray and mammography markets.
