GOLDEN, COLORADO – On Tuesday October 14th, 2008, Echoserve, Inc. hosted the bi-monthly meeting of the Colorado Association of Biomedical Equipment Technicians (CABMET). The meeting included a presentation by Joan Henneberry, the Executive Director for the Colorado Department of Health Care Policy and Financing (HCPF). The HCPF administers programs that serve approximately 700,000 Coloradoans and manages a budget of approximately \$3.4 billion. During her presentation, Ms. Henneberry spoke about issues related to Governor Ritter’s “Building Blocks for Health Care Reform” plan to contain costs, improve quality and expand the availability of healthcare.

“We need to think twice about our behavior,” said Ms. Henneberry while referring to healthcare spending. “When you can save a dollar, be proud of it.”

“It was an honor for our organization to have Joan Henneberry speak to us regarding healthcare expenditures in Colorado,” said Dave Scott, President of CABMET. “Our organization is an integral part of controlling costs at a hospital level.”

“There are very serious issues facing the health care industry here in Colorado and throughout the country. Ms. Henneberry provided an excellent perspective on some of the critical high-level challenges and realities facing our state. I was pleased to have a forum for getting CABMET and the role of biomedical engineering in healthcare management visibility at the Colorado state government level,” added Chris Cone, Chief Executive Officer of Echoserve.
