

Uninterruptible Power Supplies

Echoserve provides a range of uninterruptible power supplies to protect your ultrasound system investment. These UPS systems provide clean power to prevent electrical fluctuations or surges which may result in damaged power supplies or other damage to your ultrasound system.

Each UPS is carefully configured to the unique power requirements of the ultrasound model.

Features and Benefits

- True online technology provides all power protection
- Lightning and surge protection
- Short circuit and overload protection
- Advanced battery management (ABM)
- Battery replacement warning
- Automatic diagnostics and battery check
- Schedule shutdown and reboot
- RS-232 communication port with monitoring software
